Education

National Institute of Technology, Rourkela

Bachelor of Technology in Computer Science and Engineering (CGPA: 6.59)

Expected April 2027

Rourkela, Odisha

Jawahar Navodaya Vidyalaya (JNV), Jhabua

Class XII – CBSE, Science (PCM) (Percentage – 81.2%)

May 2022

Jhabua, Madhya Pradesh

Jawahar Navodaya Vidyalaya (JNV), Jhabua

Class X – CBSE (Percentage – 87.2%)

April 2019

Jhabua, Madhya Pradesh

Relevant Coursework

- Data Structures and Algorithms
- Database Management Systems
- Object Oriented Programming
- Operating Systems
- Computer Networks
- System Design

Work Experience

Gazebo Labs Private Limited (IIT Bhubaneswar Research Park) June 2026 – Aug 2026 — **Certificate**

Data Analyst Intern – Data & Business Intelligence Division

Bhubaneswar, India

- Cleaned and validated telemetry and sensor data from smart IoT aquaculture devices – the foundation every downstream dashboard relied on.
- Built interactive Python/SQL dashboards giving engineering teams real-time visibility into device health and pond metrics.
- Automated recurring analytical reports and tracking pipelines, cutting manual reporting turnaround by 70%.
- Ran exploratory data analysis to catch operational trends and hardware telemetry issues early.

Projects

SeatWise | *Next.js, PostgreSQL (Neon), Drizzle ORM, Stripe, Better-Auth*

Live Demo | GitHub

- Built a full-stack event ticketing platform: interactive seat maps, dynamic pricing, and real-time checkout.
- Eliminated double-booking under concurrent buyers using atomic PostgreSQL transactions (`SELECT ... FOR UPDATE`) for seat holds.
- Shipped Stripe Checkout with idempotent webhook handlers and server-verifiable QR check-in to block duplicate entry.

FlagWise | *TypeScript, Fastify, PostgreSQL, Redis, Docker*

Live Demo | GitHub

- Built a feature-flag microservice with REST APIs for flag config, targeting rules, and rollout percentages.
- Cut flag evaluation latency to under 5ms with a Redis caching layer in front of the evaluation engine.
- Shipped production-ready with Docker Compose and 27+ Jest suites at 90%+ code coverage.

Distributed Job Scheduler | *Node.js, TypeScript, PostgreSQL, Docker Compose*

Live Demo | GitHub

- Built a distributed cron-style job scheduler backed by a persistent PostgreSQL queue.
- Eliminated multi-worker race conditions with `SKIP LOCKED` locking and heartbeat-based lease renewal.
- Added exponential backoff retries and a Dead-Letter Queue; verified fault tolerance via chaos testing.

Achievements/Certifications

- **Problem Setter, The Timeless Saga** **Algorithmic & Programming Society, NIT Rourkela**
Curated 30+ competitive programming challenges for the society's flagship contest.
- **Hack Innovision Participant** **NIT Rourkela**
Participated in the 36-hour annual national hackathon, prototyping full-stack software solutions. **Certificate**

Technical Skills

- **Languages:** TypeScript, JavaScript (ES6+), Python, C++, SQL, HTML5, CSS3
- **Frontend:** React.js, Next.js (App Router), Tailwind CSS, Responsive UI/UX
- **Backend & APIs:** Node.js, Fastify, Express.js, RESTful APIs, Better-Auth, Stripe API
- **Databases & DevOps:** PostgreSQL, Neon DB, Drizzle ORM, Redis, Docker, Docker Compose, Git, Jest, Linux
